

United Ply 4 Felt

DESCRIPTION

United Ply 4 Felt is manufactured with a heavyweight fiberglass mat containing heat-cured resinous binders. High-strength glass mats are saturated with TYPE IV asphalt respectively, giving United Ply 4 Felt incredible strength and weathering capabilities, as well as a uniform porosity for ease in application. United Ply 4 Felt is a ply sheets used in hot mopped roofing applications and may be the basic ply sheets used in all smooth and gravel surfaced roofing systems requiring the ASTM D-2178 TYPE IV.

PREPARATION

Sweep roof deck to remove dirt and debris. The roof deck must be clean, smooth and free of moisture. Replace any damaged sheathing.

STORAGE / CARE

Rolls should be stored upright, off ground, completely protected from the weather.

INSTALLATION

United Ply 4 Felt is applied in either hot asphalt

PROPERTIES

Weight: 38 lbs. per roll
Dimensions: 36" x 180' (540 sq. ft.)
Thickness: 0.6mm (24 mils)
Coverage: Five squares
